W. L. SHEPARD. Engraved according to Art. 10 of the Statute, A. D. 1800, by H. Appleton, & Co. in the Office of the Librarian of Congress, Washington. W. WELLS DEL.

*The Chickahominy*

New York, D. Appleton & Co.

We spent in our visits to Virginia some of the finest hours of our life. The new historic style was built in our minds, and the scene presented to the eye, and in there is much that is interesting and beautiful to the lover of the picturesque and in the objects and scenes of nature. It is a tribute to the James, his colony, and his descendants, that it is navigable for some twenty-five or thirty miles from the river.

To the physical geographer the Chesapeake Bay is interesting from the fact that it is the northernmost locality that claims features as a flow of the continent to the ocean of the Atlantic and the States further south, as well as the climate. The climate here presents its curious features, and the annual snow, the most brilliant in the United States, and the general appearance of the country in the season, with its rich vegetation from vegetation, is a striking contrast with the Southern States. Vines and other plants, which are common in the way of the South, are found here. The climate is also a fine example of a mixed climate, and is a good example of the climate of the North. It is the only place in the North where the climate is so warm and the vegetation so rich. The climate is also a good example of the climate of the South, and is a good example of the climate of the North. It is the only place in the North where the climate is so warm and the vegetation so rich. The climate is also a good example of the climate of the South, and is a good example of the climate of the North. It is the only place in the North where the climate is so warm and the vegetation so rich.

The Chesapeake Bay is the largest body of water in the United States, and is the only one of its kind in the world. It is the only place in the North where the climate is so warm and the vegetation so rich. The climate is also a good example of the climate of the South, and is a good example of the climate of the North. It is the only place in the North where the climate is so warm and the vegetation so rich. The climate is also a good example of the climate of the South, and is a good example of the climate of the North. It is the only place in the North where the climate is so warm and the vegetation so rich.
