Wwe	Ü 2 Do 09:00-11:00 C 4.234 Böhler

Art der Prüfung: Multimediale Präsentation

Kommentar:

This course aims to provide a pragmatic knowledge of Quality Management as a program for eliminating defects, reducing waste, achieving consistent customer satisfaction, and improving economic value. It is structured around four parts. The core of the model reflects (1) the external and internal interfaces between suppliers and customers, and (2) the structural links between the business processes. This connectivity is based on cultural factors (3) commitment to quality, and (4) the communication of the quality culture. The philosophy of a total quality auditing process is exemplified by the European Quality Award self-assessment model and is compared with the Malcolm Baldrige system. The overview of systems and tools is illustrated by an excursion and by case studies based on real situations.

Based on a comparative analysis of outdoor recreation practices in a global context, this course will focus on the intercommunication of social, cultural, psychological and economic factors. In this pragmatic context students will analyze trends in attitudes, values and structures influencing tourism. Case studies will explicate the promotion of commercial recreation attractions, problems of leisure travel, the stability of entrepreneurial ventures in tourism, research and planning strategies relevant to commercial ventures and the management of resources. Also, two participants for each topic will prepare and orally present a five-page paper on selected issues.
